LEADERSHIP FOR
A NEW ERA OF
SUPPLY CHAIN
DEMANDS**

AGILE
FLEXIBLE
LEAN

There is nothing simple about supply chains today. Complexity is a given and change is a constant. United Facilities can provide the leadership you need to thrive. A family-run, asset-based 3PL headquartered in Peoria, Illinois, we own or operate almost nine million square feet of food grade/organic warehouse space in six major markets across the U.S.

But we're much more than a warehousing company. We leverage our nationwide assets, ownership-first approach and nearly 70 years of logistics know-how to offer some of the most flexible agreement terms and competitive rates in the industry.

We're lean, agile and transparent. Fewer layers give you direct communication with our decision makers and allow us to cut through the red tape and make course corrections on the fly.

It's no wonder some of the world's largest companies trust United Facilities to manage critical aspects of their supply chains.

Squeezing out waste — It starts at your onboarding: Applying our best practices in logistics management to eliminate steps, reduce your need for storage and find more efficient ways to handle your products.

Minimizing risk — Extreme weather. Business interruptions. Sudden demand spikes. Need-it-now expectations. Unanticipated everything. United Facilities works with you to reduce risk, solve today's challenges and make sure you're ready for tomorrow's surprises.

Scaling to your needs — At United Facilities we know every shipper is different. So whether it's a planned, seasonal spike or an unplanned, end-of-the-quarter rush, we provide only the resources you need. And nothing less.

POWERED BY DATA

Driven by a mission to
never stop improving

Data collection and analysis are two of the most important priorities at United Facilities—and always have been. That’s because data directs virtually every aspect of our decision-making. It helps us uncover the insights that ensure our people, equipment and facilities are operating at their highest potential.

- Warehouse analytics and statistical modeling help us predict supply chain demands on our labor and equipment, make course corrections before constraints occur and anticipate problems before they happen.
- Our state-of-the-art WMS, efficient facility design and logistics optimization tools deliver the predictable, KPI-driven performance you need to evaluate success, while giving you the agility to pivot quickly in a shifting marketplace.

Better every day

United Facilities recognized the uncertainties of logistics years ago by adopting a culture of Continuous Improvement. At every stage of our operations—from receipt to fulfillment—we look for ways to make things easier, faster, more streamlined, less costly and more transparent for our customers.

Because we believe that no matter how well we do things, there’s always a way to do them better.

**WEST COAST
EAST COAST
NO COAST**

We go wherever our
customers need us

8 Million Feet². And Growing.

The United Facilities' network of logistics warehouses stretches from the West Coast to the East Coast and from Denver to Chicago. These diverse market distribution points allow us to be regional distribution centers for some of the largest companies in the U.S.

Our strategic locations—close to ports and rail—not only help reduce your transportation costs, but put you in close proximity to key labor centers. And if you need a new distribution center, we can help you identify markets with the most skilled and affordable

workers and the right cultural fit for your business. Our real estate brokers, working in tandem with our market analysts, can help you find the ideal location anywhere in the country. And we'll be right there with you.

At United Facilities we believe in operating Lean. It's part of our DNA and driven by our people. How can we increase the value of our services while helping you do more with less? Less effort. Less time. Less money. Less risk.

Packaging, kitting, in-store displays and fulfillment engineering are just a few of the services we offer to help streamline your operations. Our comprehensive EDI and reporting capabilities deliver flawless orders to your customers. And our quality inspection and track-and-trace technologies ensure a safer supply chain.

It all starts with our people. We train and support them with the tools they need to work safely and effectively every day, and then do everything we can to keep them productive—not just for us, but for you.

It's one more advantage you get from partnering with a nationally recognized logistics company, where customer service is much more than an 800#.

**SERVICE
CENTERED.
PEOPLE
POWERED.**

MOVING OUR CUSTOMERS FORWARD FOR NEARLY 70 YEARS

United Facilities established its first warehouse in 1953, when logistics was still a concept for the military. But by 1959 we had landed one of the first multiyear warehouse contracts in the nation and become a pioneer—and a leader—in the new 3PL industry.

Soon we were growing and expanding across the country, developing innovative tools to improve material handling and streamline warehouse management.

Today, we continue to add services and technologies to help solve our customers' supply chain problems, anticipate their needs and help them adapt to change.

It's what you'd expect from a logistics leader.

Find out how a logistics innovation leader can help maximize your supply chain value in a rapidly changing environment. Visit unifac.com or call United Facilities today at 866.699.7271.
